

SSH活動報告

Thailand-Japan Student Science Fair 2018(6月7日~9日/ピッサヌローク)ほか、タイ王国での国際交流

3年SSHクラスの生徒2名が6月3日から13日までタイ王国を訪れ、科学を通じた若者の国際交流を目的としたタイ王国教育省主催、文部科学省後援のイベントに参加しました。また本校と科学研究を通じた相互交流に関する覚書を交わしている、プリンセス・チュラポー・サイエンス・ハイスクール・トラン校ならびにパヤオ大学附属高等学校を訪問してきました。

International exchange through science

3年10組 佐藤 駿

I went to Thailand for ten days. As a representative of my school, I did some activities to build friendships at Trang and Phayao, and participated in the science fair.

It was held from June 7th to 9th at Phitsanulok. I did an oral and poster presentation there, of course in English. Also, I presented to the princess. It was only for two minutes, but it was a special experience for me, and also I could learn about Thai manners. On the other days, I went on field trips about traditional Thai medicine. I made a medicine called Ya-hom and learned about Thai massages. I've never done any of these activities before.

Through this trip, what I've learned about the most is the difference between the cultures. Thai culture surprised me many times. In Thailand, buying from food stands for meals is normal, so there are many stands along the streets. It's unbelievable, isn't it? I had been interested in the cultures of other countries, so it was exciting for me. This trip made me think about what I want to be in the future.
